

**Prototype B Requirements**

*The working prototype will be an application that will allow California residents to establish and manage their profile and receive emergency and non-emergency notifications via email, Short Message Service (SMS), and/or push notification based on the location and contact information provided in their profile and/or the geo-location of their cellphone if they have opted in for this service. In addition, the working prototype will provide the authorized administrative users with the ability to publish notifications and track, and analyze and visualize related data. The working prototype does not need to implement any authentication or authorization against an external directory or authentication mechanism.*
